

In re Appln. of: Kenneth Schoenberger
Appln. No.: 10/748,838
Attorney docket: 746-A03-009

Art Unit: 3721

In the Specification:

Paragraph bridging pages 3 and 4

Referring now to the drawings, Figs. 1 and 2 show the preferred embodiment of the novel box 10, which consists of the following double wall construction. An outside layer of metallized polyester film (radiant barrier) 20 is laminated to 57# kraft liner 22, a 33# "B" flute medium 36 is bonded to kraft liner 22, an inside layer of metallized polyester film (radiant barrier) 24 is laminated to 57# kraft liner 26, a 33# "C" flute medium 38 is bonded to kraft liner 26, and a sandwich 40 of metallized polyester film (radiant barrier) 28 is bonded between two 26# kraft liners 30, 32. The kraft liners 30, 32 are bonded, respectively, to the 33# "B" and "C" flute mediums [[46]] 36, 38.
